

Dedek Testimonial for Brady Builders, Inc.

When we met Mike and Jason Brady, we sought a new porch and renovations which would enhance a sixty-five year old house which we loved without detracting from the historical significance. They gave us beautiful addition which looks as if it was always there. They maintained the character of the home with their meticulous attention to detail, such as their search for complementing brick, matching grout color, building a matching copper roof, fabricating molding identical to the original and innovative molding to coordinate the new kitchen and breakfast room. We are so appreciative of their many creative suggestions which include:

- A shelf added to porch safety rails.
- Insulated kitchen floor over garage.
- A sunken porch to allow cleaning with a garden hose.
- The outside stair design for safety and prevention of debris buildup.
- A wider driveway to accommodate turns.
- Changing driveway elevations to prevent tree root damage near the woods and prevent bottoming cars at street.
- The roof design to maximize drainage and minimize debris.
- Building brick columns for lighting, water and power.
- The vaulted porch and kitchen ceiling design.
- Design of retaining walls, brick drive edging and cement curvature at the street.
- Two Zones heating and air for addition.

We are so grateful to Mike and Jason for our new porch, kitchen, bathrooms and driveway. The quality and pace of construction, continual clean-up, top-of-the-line sub-contractors and craftsmen and their attention to detail exceeded our wildest expectations. We trust them. We recommend them without reservation for any project and welcome any opportunity to work with them in the future.
